[Portfolio](#) | [LinkedIn Profile](#)

❖ Summary:

I am a Frontend Developer who enjoys creating websites using HTML, CSS, JavaScript, and React. I can build responsive and user-friendly web pages. I know how to connect APIs, manage data using React state and make fast-loading websites. I am always ready to learn more and improve my skills by working on real projects.

❖ Experience:

Frontend Development Intern—Codace-Solution Worked on React.js projects focusing on component-based architecture, REST API integration and implemented reusable components and managed state efficiently using Context API and Redux Toolkit. Utilized Git and GitHub for version control and team collaboration.

❖ Projects:

1. AI-Driven Human Resource Management System – FYP

Technologies: React.js, Redux, Node.js, Express.js, MongoDB, Gemini

- Developed a full-stack AI-based HRMS to automate HR processes such as leave scheduling and mood analysis.
 - Features: Dashboard, mood-based attendance, leave approval system.
 - [Live: metrohrms.netlify.app](#)

2. Organic Store – Static Grocery Website

Technologies: HTML, CSS, JavaScript

- Created a fully responsive static grocery website with smooth layout
- [Live: organicstorebynoman.netlify.app](#)

3. CRUD App – Axios Based Task Manager

Technologies: React.js, Axios

- Built a CRUD app using Axios for API integration
 - [Live: axioscrud-noman.netlify.app](#)
-

❖ Skills:

- Development: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), React.js.
 - Soft Skills: Communication, Leadership, Problem-Solving, Team Collaboration.
-

❖ Education:

- Bachelor of Science in Information Technology | 2021 - 2025 | **University of Punjab**
-

❖ Rewards:

- Web Development Course – PNY Training Institute *Learned HTML, CSS, JavaScript, and React.*
